Home Auotmation server in VB

ajay_bhargav, Mon Aug 11 2008, 11:22 am

As you all know the original home automation server namely, HAserver was written in Borland delphi and everyone was having problem with it as no source was there

So i took time out of my daily schedule to build this VB Version of HAserver. I hope it is helpful to you all, please use forum if you have any problem using it.
