Proteus Model - Nokia 3310 LCD

Hey friends,

If you are afraid of soldering Nokia LCD with your hands and still want to check your code..
here is a solution for you..

One of our Russian friend "Tanu Sha" (hope the name is correct) has made this sweet Nokia 3310 LCD model which simulate the original Nokia LCD.

This Proteus model has been tested with the following versions of Proteus VSM Co-simulator

Proteus v6.9 SP5

Proteus v7.2 SP2

Proteus v7.4 SP3

In other versions you might see error like "dll not authorized" something.. we really dont have any solution for that. anyways.. have fun using this model..

here are some screenshots:

You can download this Model here:
