RC-5 Remote applications

ajay_bhargav, Fri Sep 21 2007, 03:21 pm

There are many websites which explain the working of RC5 remote also give codes but many people found them not working or there is always a lack of information provided. There are few people who are also charging money for making simple things which even a noob can do...

Now you need not to pay anyone for making your own IR based application. Use you TV remote to control your switching appliances like TV, fan, bulb etc..
You can download this simple project for link below..
IR Remote Switch using TV remote (RC5 Protocol)

Also you can download simple stand alone library of for RC5 Decoding. which is available at
RC5 decoding using TSOP1736 and 8051

If you have any doubts.. simply post them in the forum.. i am always here to help you!
Wish you good luck for your projects!
